Full-stack web developer with a degree in communications looking to build clean and responsive web layouts. Recently earned a certificate in full stack web development from the University of Denver's coding bootcamp, with newly developed skills in JavaScript, CSS, Node.js, and responsive web design. Known as a team oriented individual, with a heavy focus on collaboration and problem solving. Passionate about taking on new and challenging projects in order to create meaningful web applications. Excited to leverage my new skills in a team environment with the end goal of designing a better user experience on the web.
